Allowable Subject Matter

1. Claims 1 – 4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a wireless call system having an outdoor and indoor unit for providing access to a visitor when using the outdoor unit.

Applicant's independent claim 1 recites, *inter alia*, a wireless call system with a structure as defined in the specification (pages 9 – 13) including an outdoor unit having a call button, an image pickup, a fingerprint input means, unlock control means, wherein the call button body is formed of conductive material and grounded; the outdoor unit having a housing with a circuit board carrying contacts and a spring interposed between the flange portion of the call button body and the base panel; a portable indoor unit connected to the outdoor unit by radio, having a display for displaying the visitor's image, having the unlock means, the base panel having a panel front surface with a fixed contact disposed thereon opposite to the movable contact and a grounded conductive part also formed on the panel front surface, and the call button body being electrically connected by a connection line to the grounded conductive part. Applicant's independent claim 1 comprises a particular combination of element, which is neither taught nor suggested by the prior art.

Accordingly, applicant's claims are allowed for these reasons and for the reasons recited by applicant in the amendment filed on 8/20/2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
